braun vitality electric toothbrush manual

Please read the use instructions care fully before first use. This guarantee does not cover damage due to improper use, normal wear or use, especially regarding the brush heads. OralB does not sell replacement brush heads or handle parts under any other brand name. Our OralB Vitality toothbrush doesn't come with a charging indicator feature, so it can be tricky to tell when it is charging. The best way to check whether these brushes are charging is to pick the toothbrush up off the charger after 30 mins and switch it on, if it comes to life you know that the juice is flowing and can switch it off and leave it on the charging stand for the full 16 hours it needs to retain a full charge. With these toothbrushes it's important to know that they need to be turned off in order to accept a charge. If your toothbrush doesn't come on when you pick it off the charger to check, it's likely that it may be in the on position, and so the best thing to do here is to place it back onto the charger without pressing the button again and leave it for another 30 mins and try it again. If it still doesn't come on, then there may be an issue, so just get back in touch and we can investigate it further for you. Our Vitality range of OralB electric toothbrushes is our simplest range, with the fewest features, for those consumers who are looking for just the basics. We like to have something for everyone. Fortunately for consumers who are looking for a charging light, the rest of our range includes one of these. It is a touch more expensive, a bit better battery life, enhanced cleaning action the inclusion of a pressure sensor and travel case it is a worthwhile investment. It's actually the brush we rate as the best overall electric toothbrush. Our site is funded by affiliate revenue and ads, but we only recommend products that we have tested and truly believe to be worth your money. The Vitality 100 has a built-in 30 second pacer quadpacer that the Vitality does not have. The Vitality 100 has a NiMH battery that lasts 8 days on a full charge compared to the 5 days of the original Vitality. The Vitality 100 comes with either a Black or White rubber grip to the handle. The Black coloured grip means a CrossAction brush head will be supplied, whereas a 3D White brush head will be supplied with the White coloured grip. The way that they clean, the battery life and day to day use is the same. Easy to use with 1 cleaning mode. The key difference is the colour of the grip on the handle and the brush head supplied. You get what you need. Sadly, the Plus tends to be a couple of pounds more expensive, so although it could appear better value, the saving for 1 extra head, is generally negligible. It has a tapered design where it is thicker at the top of the handle and thinner towards the bottom. OralB's more premium models tend to have a more uniform shape down the length of the handle, which I prefer personally. There is a rubber grip that is wrapped around the majority of the brush handle, which not only makes the brush look smart and easy to hold, it reduces the very clinical look of the white plastic. Black is the most common option, but there is too white or arguably a very light grey as an alternative. A small raised piece of rubber extends very slightly just below the

neck of the handle. This stops the toothbrush rolling if laid on a countertop. You can happily rinse it under the tap to give it a clean, avoid complete submersion in water though. <http://www.axi-hohenstein.de/userfiles/craftsman-electric-garage-door-opener-manual.xml>

It provides significantly more movements to the brush head than a manual toothbrush to help you achieve a greater standard of clean. But there is a subtle difference between the Vitality and models within OralB's Pro series. In the upper third of the brush handle, the button, complete with a power icon, needs to be pressed to turn the brush on and off. Not too soft that the brush is turned on very easily, but not too stiff that it feels hard work to use it. This prong feeds down inside the handle to the motor. The 2 minute timer and the 30 second pacer. Make sure you learn how to brush your teeth properly, you don't use an electric brush in the same way you do a manual toothbrush. There is no battery icon, so it's up to you to recharge it regularly if you want to avoid it going flat mid clean. They are interchangeable. That equates to an extra 3.5 days or an extra 7 brushing sessions. The Vitality still uses a Nickel Metal Hydride NiMH battery compared to many others that have LithiumIon. I imagine price has something to do with why it was excluded. There is no battery or charging icon. This is one of the appeals for sure of the premium models OralB offers. This voltage is supported in Europe too, but you will need a plug adapter as the 2 pin charger is designed for UK bathrooms and not EU plug sockets. In the section below, I discuss the price more generally and in relation to similar products. Replacement heads can be purchased in packs of 4 and are priced on average at about 10, but if you wish to buy bigger packs such as in packs of 8, this could work out ever so slightly cheaper as these can be purchased for just under 10. It is also an updated model so we would expect it to maybe work a bit better than the Vitality. These figures were correct at the time of writing and should not be relied upon as hard fact, but used as a guide during your decision process. After repeated charges and discharges it can fail and should it, they are not easy to replace.

Remember, register your brush online to get that third years warranty, because should it fail in this time it will be covered. Yes, with OralB 2D motion that oscillates and rotates. What is daily clean mode. This is the comprehensive everyday cleaning mode that works with the provided Precision Clean brush head to effectively clean the teeth using the OralB 2D oscillating and rotating technology to clean the teeth and remove up to 100% more plaque than a manual brush. What brush head does it come with and what alternative ones can be used. With the Vitality, you get one brush CrossAction or 3D White brush head. You can change the head with any others on offer from OralB. There are many that work with the brush handle. There are 6 main brush head options that include Cross Action, Floss Action, 3D White, Sensi UltraThin, Precision Clean and TriZone. Does the Vitality have a pressure sensor. No, it does not. Does the Vitality have Bluetooth. No, it does not. Does the Vitality have sound connectivity. If purchased new from an approved retailer the Vitality will come with a 2 year warranty which can be extended by a further year to 3 in total if you register the brush online on OralB's website. Does the Vitality have a builtin timer Yes. It has a timer which vibrates as the 2 minute daily cycle has been completed. It also has a 30 second pacer. How long does the battery last. The battery lasts 32 minutes, which if used on the standard daily clean mode is 8 days based on 2 cleans per day. Does it come with a smart wireless guide. No, it does not. Does it come with a charger. Yes, a charging station is included with the Vitality. The charger is 2 pin, how can I use it. If you do not have a shaver socket, you can purchase an adapter that will allow the charger to be connected to a standard 3 pin UK mains socket. Can this be fixed to a wall. The Vitality charging station has not been designed to be fixed to a wall. Does it come with a travel case.

LEARA C. 5.0 out of 5 stars Please forward to them. I bought 2 in 2017 and have had no problems with it at all. However, recently, I have had many complaints. Taking my word, too many people have told me their product stopped working only weeks after receiving it. Also, that the coupons sent out with the toothbrush are always expired. They have even had a replacement with outdated coupons. I promote this product because between our tooth oil that we sell and this toothbrush everyone is reporting perfect gums and teeth. I don't care that the price has gone up, but I do care that there are so many problems with performance now. And the expired coupon. That is just strange. I don't expect this to be printed, but I would appreciate this getting to the right person who can tell me things are being put into place to get back on track. I am not so willing to share this with another 150 of my customers until the problems are rectified. Leara Clausing Frequency Foods I've been so sick of kids high dentist bills in the last few years that I figured it couldn't hurt to try. I can absolutely feel a difference between using the OralB Vitality vs. Even though I always thought I brushed well enough, I've found I'm brushing longer because of the built-in timer; it vibrates 4 times when you hit the two-minute mark, but won't turn off until you manually turn it off so if you missed a spot, you can keep going for a few more seconds. I'm noticing my kids' teeth look more polished, too, when I help with their flossing. The reason this is 4 stars instead of 5 is because it has one minor flaw that isn't really a dealbreaker, but could definitely be improved on future models of this brush. The problem is that there is no indicator for charging.

<https://myvirtualgaming.com/images/88-bronco-manual-hubs.pdf>

It does not let you know if it's fully charged nor does it let you know if the battery is almost drained and needs to be put on the charger. I wish it had some kind of indicator light that would glow green for fully charged and red for needs to be charged instead of me playing a guessing game. I've underestimated the battery life once or twice where it shut off in the middle of brushing, which isn't a huge deal because I can use it as a manual toothbrush still at that point, but I would prefer to know that it needs to go on the charger without guessing or having it shut off. I also worry that I'm leaving it on the charger for too long, which as anyone with a cell phone probably knows, can reduce the battery life and require replacement a lot sooner because the battery can't hold a charge for as long. The packaging is tough though. Of course you can get better brushes, but they also cost much,

much more. First few times you use it, you'll feel postdentist clean, but you'll soon get used to it and anything less will feel dirty. The timer feature helps you make sure you're brushing for long enough. Sometimes I don't finish by the time it buzzes, so I just keep brushing for a bit longer. It comes with a replacement head, and a nice little charger. I can use it about a week between charges. My one major gripe is the packaging is difficult to get through. It's efficiently and aesthetically packaged, but at the cost of convenience in opening it. However, it's not a big enough deal for me to dock a star. Maybe someday there will be a frustration-free packaging option for this. I bought 1 for my household of 4. I bought several brush heads so each family member will put on their own brush head when it's their turn to brush. I also bought my college student daughter one as a gift. I notice that if you make sure you keep the charger dry sometimes water will drip down from the brush head then the brush will continue to have good energy and brush speed.

If it gets wet and you don't wipe it or keep it dry then the charge won't be that great and the power a little weaker. I don't think it matters if the brush is more expensive as long as it does the same job. Replacement brush heads are way cheaper too. If I had to buy another electric toothbrush I wouldn't feel so guilty because the cost is still low and I would still have paid less for a 2nd toothbrush compared to one more expensive brush. His periodontist recommended he use an electronic toothbrush twice daily to maintain plaque buildup and keep his gums in check. He had a different model, or brand can't remember which but it was lost along with a bag and all of its other contents during a recent business travel trip by the wonderful airport shuttle service I have impacted wisdom teeth and don't feel that I can properly clean them with a manual toothbrush; this sets my mind at ease! Sorry, we failed to record your vote. Please try again Having used the previous generation and this one, there is no difference in performance. Pay the extra money for the authentic brush heads. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Also there is a timer which is awesome. My teeth feel cleaner than they ever have. The fact that it's rechargeable is good, cause then you don't have to constantly replace the batteries and bring them to the recycling center. Sorry, we failed to record your vote. Please try again It's quite nice that it has rechargeable options vs the traditional battery-powered option. She used this quite a lot and quite aggressively as the brush heads don't seem to last very long. The biggest selling point for me was that the replacement heads on this product are reasonably priced compared to other toothbrush models. Product has nice power to it and charge lasts quite long which surprised us. Would recommend this to anyone who is an aggressive brusher and requires frequent toothbrush head replacements.

Sorry, we failed to record your vote. Please try again This is my first electric toothbrush, so I do not know what more expensive electric toothbrushes are like, but this one leaves your mouth feeling much cleaner than a manual toothbrush does. It is a very simple product, not too bulky, and takes up little space on the counter. It has just a power button on it and will pulse four times as part of its built-in two-minute timer. It lasts about five days brushing twice per day you will notice when the battery is about to run out as it will become less powerful, eventually stopping. My bones to pick with this product are that it sounds like a power tool pretty noisy and that its charge time is very long 16 hours to a full charge. Sorry, we failed to record your vote. Please try again Also I believe these toothbrushes were sitting somewhere in a warehouse because when I opened the package there was a coupon for replacement brushes which expired over a year ago. Sorry, we failed to record your vote. Please try again If you are looking for a simple easy to use toothbrush, this is the one you should get. Plus the replacement heads are far more economical than the competitors. Cmon, really Another perk is the timer, it makes sure you are brushing for 2 minutes, the recommended time your Dentist suggests. All in all a good buy, highly recommend this to anyone

looking for something not so fancy!Sorry, we failed to record your vote. Please try again This is the first one I have ever purchased. I looked through countless reviews on all including the top electric toothbrushes before purchasing this one.I am very happy with the value of this toothbrush. I can keep it off the charge station for more than a week and it still works great. It is a firm brush so if you have sensitive gums it may give you an issue.Charging station is small and fits nice on my counter. Overall happy with the purchase!Sorry, we failed to record your vote.

Please try again Tiene temporizador, pasado 2 minutos el cepillo da una senal vibrando de una manera diferente. Bastante recomendable para una mayor limpieza dental.Sorry, we failed to record your vote. Please try again The battery lasts for many days if he forgets to charge it, and the charger base is easy to use. It doesnt take up a lot of space, which is a plus. It works well, he got a thumbs up from his dentist last week. Its not too noisy either.Sorry, we failed to record your vote. Please try again Now 5 months later it won't charge or turn on at all. Extremely disappointed with the quality.Sorry, we failed to record your vote. Please try again My wife said she liked it but I bought another one, the double head for me. It worked great. After charging once to hers about 3 times, she finally said, OK, can I get one like yours. She loved it too. The double brush action feels great on teeth and gums. Dental hygienist says that she could already see the difference. The price was excellent and delivery was phenomenally quick. I would recommend this to anyone.Sorry, we failed to record your vote. Please try again I have been used it for almost a month and have charged the toothbrush 3 times.I roughly charged the toothbrush once a week. Its brush is softer than I thought I got sensitive teeth and I think it is quite soft and clean.Sorry, we failed to record your vote. Please try again It has been an excellent product and a great toothbrush, but I thought it was time to get new ones. This new one is even better, stronger motor, easier to remove head for better cleaning, and reaches all corners of my mouth. The 2 minute times is really useful, and the design of the rechargeable base is much better as its way easier to clean. Love it, hopefully itll last for at least 34 years, though I expect itll go longer.Sorry, we failed to record your vote.

Cant find that model to replace. So I decided the Braun Oral B Vitality was good as any. I use the floss action brush heads already so this made sense. And it uses most heads. I couldnt find a reason I had to upgrade to a more expensive model and since having this I have no regrets. Great cleaning in 2 mins. I definitely could feel the difference in how clean my teeth were and they did shine. Very happy with this model.
