#### Research Proposal Template (taken from Researchnet - How to apply for a research degree)

#### Proposal guidance

- Provide an overview of your research question, explaining why it is of academic and or
- . Outline the main objectives of your research, providing details of two or three key
- Write a short literature review, indicating the importance of previous related research or investigated literature and how your own research question might make a useful contribution to the area
- · State the main research techniques (interviews, case studies, modelling etc.) you might
- Indicate your suggested data collection procedures, indicating sources and any possible difficulties
- · Explain any analytical techniques you intend to use
- State your proposed timetable of activities Finally, list the references in your proposal or provide a short bibliography.

Some of the common problems In our experience, there are a number of common reasons why proposals from well

- qualified potential students are rejected. Some common problems are outlined below:
- · Your research topic is inadequately specified. You must write to a very tight format stating what you plan to research, why and how. The format is clearly outlined above.
- Whilst your proposal may identify a practical managerial problem it does not demonstrate its analytical importance. A study that merely aims to discover new empirical information or simply solve a current issue will probably not be accepted. Your proposal must engage with controversies, new ideas/thought and demonstrate strong critical insight into one or more academic disciplines to succeed in your research.
- Other proposals are rejected because their 'geographical' focus does not fit with our supervisory competencies. Our perspective is international, whereas some overseas students seek to study an issue which is exclusively in their home country. If you intend to do this, it should be indicated clearly and how Coventry University will add value to your work.

## Research Paper Proposal Sample

A research proposal considers your overall topic ideas, your research question, your research process, and your sources and scaffolds what the next steps will be for the project. Many disciplines require written proposals before an experiment can be run, before a presentation can be made, before a seminar paper can be written. Research proposals can vary in length depending on the scale and scope of the project at hand. However, in general, all share certain conventions: framing of the project or contextualization or putting the project in context or conversation with other research; a tentative thesis or claim or hypothesis; an approach or methodology; target audience; tentative sources or references. Depending on the academic discipline, a research proposal may include other required features.

For example, the following is a one-page seminar paper proposal for a literature class:

Michelle V. Dr. Norman EH 540 July 13, 2001

#### Paper Proposal: 'You Looks Like Youse Yo' Own Daughter': Figuring (In)fertility and Maternity in Their Eyes Were Watching God

Although critical responses to Hurston's Their Eyes Were Watching God have focused extensively on both sexuality and images of fecundity in the text, analyses that fully address fertility and maternity in the novel are as strangely absent from the critical literature as the presumable fact of Janie's reproductive capacity is from the text itself. Unlike Nella Larsen's roughly contemporary novel Quicksand, Hurston not only seems to deny the notion that marriage is death for women, she also disrupts the traditional association of marriage with pregnancy/childbirth (McDowell xxi). It is unclear whether Hurston took this non-approach to Janie's fertility in the novel as a means of disequating marriage and childbirth, or simply because pregnancy and maternity did not figure in the story she wanted to tell. However, the novel's emphasis on fertility in nature and sexuality renders this textual absence particularly problematic.

The proposed paper will begin with an examination of the ample fertility imagery in the novel. Janie's early conflation of fertility in nature, sexual desire, and marriage will be discussed, followed by the role that sexuality plays in each of her marriages. Then, the textual absence of Janie's reproductive fertility will be addressed, as well as a discussion of whether this textual absence is evidence of the novel's failed realism, as some critics have suggested, or a byproduct of the idealization of the world of the novel. A short discussion of the trope of textual absence or elision of conception and pregnancy in the works of several African American women writers will also be included.

Although I have not yet fully formulated the theoretical framework I will use to account for the problematic treatment of Janie's fertility in the novel, the textual elements that I am planning to discuss will be the extended mule metaphor/imagery (with its implications of sterility) and the depiction of other maternal relationships in the novel (particularly those of Nanny and Leafy to both each other and to Janie). Finally, I will relate the treatment of maternity and fertility in the novel with the overarching theme of Janie's quest for fulfillment/selfhood/voice/independence/embodiment.

Several extensive searches of the critical literature addressing Their Eyes have failed to reveal any fulllength articles addressing the textual absence of Janie's fertility. The articles listed below address various aspects of sexuality and sexual autonomy, marriage, and fertility imagery in the novel.

Research in Psychology I

Title: How to Write a Research Paper Introduction Without Developing an Overwhelming

Author: Jeff Aspelmeier Institution: Radford University

 Introduction:
 1. Thesis Statement: A sentence or paragraph that introduces the variables (concepts) of interest and provides the theoretical and/or applied reasons that we would expect to find a relationship between the variables that are being studied.

e.g. "The present study investigates further the biological predictors of individual differences in intense fear of small woodland creatures. A variety of mental health and medical service workers have noted the continuous demand for improved treatments for patients suffering from the ill effects of excessive exposure to small woodland creatures. However, relatively little attention has been directed to the continuous demand of the continuous terms to be reconstituted in the forest of the forest defending the continuous demand to the continuous terms of the forest defending the continuous demand to the continuous terms of the forest defending the continuous demand to the continuous terms of the forest defending the continuous demand to the continuous terms of the forest defending the continuous terms of the continuous terms of the forest defending the continuous terms of the c

of excessive exposure to small woodland creatures. However, relatively little attention has been directed toward identifying variables relevant to the prevention of this fur related phobia. Preliminary studies have focused on the biological correlates of intense feelings about animals. The present study extends this line of research."

2. Literature Review:

a) present a brief history of the field of study, including definitions of major terms and concepts and what they have been used to demonstrate or explain. Assume that the reader has some knowledge of the topic so a complete review is unnecessary. Be brief, but not too brief, b) present the pertinent general findings of important studies.

do so topically; present the major topics, relevant to your topic, that have been addressed by different studies that you have read.

if two or more studies report the same relationship between the variables you are interested in, then describe them together. Be sure to address any relevant differences

interested in, then describe them together. Be sure to address any relevant differences interested in, then describe them together. Be sure to address any relevant differences between these studies as well.

e.g., "Phobic reactions triggered by the presence of cute cuddly stimali have been noted both in the lab and in clinical settings (Watson & Rainer, 1917; George & Man in the Yellow Hat, 1960; Tennessee & Chumly, 1971; for review see Sarify, 2001). Though, not all investigations have focused specifically on cute woodland creatures

Though, not all investigations have focused specifically on cute woodland creatures these studies have consistently demonstrated that small fur bearing stimuli can elicit behavioral avoidance (Captain & Kangaroo, 1977; Tigger & Piglet, 1934), extreme negative emotionality (Watson & Rainer, 1917; Scooby & Shaggy, 1975), and anxiety/panic attacks (Garison & Hat, 2000).

Several studies have found that the size of one's spleen is associated with feelings of hostility toward and attraction to small woodland creatures (Aspelmeier, 2001; Smokey & Bear, 1997; Rocky & Bullwinkle, 1974; McKay, Garison, & Hat, 2000). McKay et al. (2000) also included emotional responses to burnyard animals (i.e. potbellied-pigs and chickens) in their measure of hostility and attraction."

- point out any areas in the literature that you feel are being neelected. - point out any areas in the literature that you feel are being neglected.

- If you are using a new and different manipulation, predictor, or dependent variable emphasize this in your review of the earlier work.

enghasize this in your review of the earlier work.

- e.g. "Though several studies have addressed the spleen and fur fear relationship, relatively little attention has been directed at identifying the role that the hepatic (liver) and pancreatic secretions play in determining one's fears regarding members of lower species.

- If you are using a new method to address an old issue, emphasize how

# RESEARCH PROPOSAL TEMPLATE

When preparing an application for entry into a research higher degree program it is necessary to supply a clear statement describing the proposed area of research (a research proposal). Consultation with a faculty or school academic staff member in the research area of interest is recommended prior to submission of an application. Liaising with an academic allows you to frame the proposal to align with established disciplines and areas of supervisor capacity.

You must write your own research proposal and reference accordingly. The exception is when your potential supervisor finalises the research proposal with you, for a specific research project that has already been defined. Please visit the University's Academic Integrity pages and policy

#### General

Detail:

Length: From one to three pages is often suitable, depending on the area of research.

The following outline may be used as a guide. You should consider each of the areas that will be relevant to your

research.

Minimum: The recommended minimum requirements are identified with an asterisk (\*).

#### Research topic/title\*

An initial working title should be provided and should describe the content and direction of your project. For example: A template for assisting research students in the development of a research proposal.

#### PROJECT DESCRIPTION

#### Background

What is already known or unknown? Set the scene.

#### Almet

What do you want to know, prove, demonstrate, analyse, test, investigate or examine? List your project aims in a logical sequence. For example: The aim of this project is to:

a) Provide an outline of a research proposal

b) Enable a prospective student to prepare a research proposal

#### Methodology\*

How do you anticipate you will achieve these aims?"

What do you need? (specify any special equipment, software or material) Can you access necessary data or expertise?

Do you require particular resources?"

Are there barriers or pitfalls?

Does the project involve human ethics, animal ethics or safety implications? Is travel or fieldwork required? If so, where to, how long and at what intervals?

### Expected outcomes, significance or rationale

Why is it important?

What do you expect it will deliver?

What are the expected outcomes?

Establish the importance of your project by highlighting its originality or why it is worth pursuing. Highlight the benefits, positive expected outcomes or innovative applications of knowledge.

#### Timetable\*

Indicate the timeframe for each broad stage considering literature surveys, data collection, production, modelling, review, analysis, testing, reporting, chapter and thesis writing, and thesis submission date.

Example psychology research proposal

Writing a research document is a little more difficult than a standard essay of high schools. You need site sources, use academic data and show scientific examples. Before you start writing the search document, you have to do your research. It is

important to understand the topic, formulate your document ideas, create your statement of thesis and learn how to speak about your subject given authoritatively. You are looking at online databases, encyclopedias, almanacs, periodicals, books, newspapers, government publications, reports, guides and academic resources. Take notes while discovering new information about your research document, the statement of thesis is where you explain to your resources. When organizing your research document, the statement of thesis is where you explain to your resources. When organizing your research document, the statement of thesis is where you explain to your resources. explain your interpretation of the topic you are looking for. Therefore, the claim of the thesis must be accurate. It should answer the question you have been assigned and there should be an opportunity for the opportunity for the opportunity for the desired. Your manuscript's body should support your thesis and should be more than a generic fact. Create OutlineMany professors require contours during the process of writing the research document. You will find that they want the contours set with a title page, abstract, introduction, search paper body and reference section. The title page is typically composed of the student's name, from the college name, from the name of the student. An introduction generally consists of one or two pages and comments on the topic on the subject o enoisacco acificeps and ni ilaudividni ireisnep e inoisserpmi emirpse acrecir id atsoporp aL .aigolocisp id acrecir id atsoporp alled amet led ereneg len atiugese eresse <sup>2</sup>Aup non ,enoizinifed rep ,aigoloib ni imelborp id acrecir id atsoporp alled inges inuclA .otteggos led avitsuase o avitinifed enoizaterpretni'nu odnacidnevir non etnemaivvo e amelborp o enoisacco acificeps anu ni ilaudividni ireisnep e inoisserpmi odnemirpse, arebil enoizisopmoc anu id e emulov oloccip nu id aciasorp enoizisopmoc anu ii aciasorp enoizisopmoc anu id e emulov oloccip nu id aciasorp enoizisopmoc anu in aciasorp enoizisopmoc anu id e emulov oloccip nu id aciasorp enoizisopmoc anu id e emulov enoizisopmoc enoizisopmoc enoizisopmoc enoizisopmoc enoizisopmoc enoizisopmoc enoizisopmoc enoizisopmoc enoizisopmoc erallortnoc id ivetarucissA. atelpmoc aifargoilbib e aniqap id "Aip a eton ,otset ni inoizatic ,iset id enoizaraihcid ,enoizudortni ,ottartsa ,olotit led aniqap aut al iarvA .atrac aut al emeisni erettem emoc erepas e acrecir id atrac id tuoyal nu id oipmese nu eredev otuvod itserva ,iamrO .elanif aipoc artsov al erevircs id otnemom li "A ;erosseforp ortsov lad inoizerroc otuvecir e azzob adnoces al e amirp anu ottircs reva opoD elanif azzob aut al ivircs .ossecorp li osrevartta eradiug a eratuia rep acnaib atrac id ipmese 'Aip eradraug e oroval id ezzob el appulivs is emoc 'Aip otseuq us Arenoiznuf ehc e aifargoilbib artsov allen eterettem itnemirefir ilauq erediced eteras, ossecorp otseug etnaruD .amirp eton eut el erazzinagro rep eraroval iarvod, ottegorp omirp out li ivircs odnauQ eton eut el azzinagro onirassecen es ,oliforp out li noc itratuia rep acrecir id atrac id oipmese nu erazzilitU .aifargoilbib aut allen onos itnemirefir iout I inoissucsid e itatlusir, idotem e ilairetam ni odnepmor ats is, acrecir id atrac alled oproc leN .acrecir id otnemucod led emoC emoC .otteggos led avitsuase o avitinifed enoizaterpretni'nu id etnemlovepasnoc edneterp non e aigolocisp allus ,osac otseug ni rule, a essay suggests a new, subjectively colored word on something, such work can have a philosophical, historical, biographical, journalistic, literary, critical, popular scientific or purely fictitious character. in the content of a proposal for search samples on psychology, first of all, the author's personality is evaluated - his worldview, thoughts and feelings. The goal of a research proposal in psychology is to develop such skills as independent creative thinking and write your thoughts. Writing a research proposal is extremely useful, because it allows the author to learn how to formulate clearly and correctly thoughts, structure information, use basic concepts, highlight causal relationships, illustrate experience with relevant examples and motivate his conclusions. Choose the best solution for you Go through the SHOW SAMPLES Samples List Writing Service we use cookies to create the best experience for you. Keep browsing if you're okay with this, or find out how to manage cookies. Any expert writer will tell you that the organization of ideas on paper is a disordered process. It takes time and effort to get your thoughts (and paragraphs) in a reasonable order. It's perfectly normal! You should wait to deconstruct and reorganize ideas while building a paper or long paper. Many students find it easier to work with visual ideas in the form of "text boxes" to organize and outline a great essay or research card. The first step in this method of organization of your work is to pour your thoughts on paper in different text boxes. Once done this, you can organize and reorder those omaissop am ociracni otrec nu rep eedi idnarq etlom ereva ommertoP .ossap omirp li "A elanroig nu id aruttircs allen iliciffid 1Aip issap ied on U .otazzinagro olledom nu eramrof a onif otset id rather lost when it comes to starting with writing — we do not always know where and how to write initial phrases. To avoid frustration, you can start with a mental dump and simply throw your random thoughts on paper in small text boxes. Imagine that your writing task is to explore the symbolism in childhood history of "Little Red Roof". In the samples provided on the left (click to enlarge), you will see different text boxes containing random thoughts about events and symbols in history. Note that some of the statements represent minor events and symbols in history. Note that some of the statements represent minor events and symbols in history. Insert -> Text box. The cursor will turn into a transverse shape that you can use to draw a box. Create some boxes and start writing random thoughts represent important topics and which represent subtopes. After throwing all your thoughts on paper, you can start organizing your boxes in an organized model. You will be able to move the boxes around the card by clicking and dragging. Once you exhaust your boxes contain important ideas, so start aligning them on the left side of your page. Then start organizing the corresponding thoughts or support (subtopes) on the right side of the page aligning them with the main topics. You can also use color as an organization tool. Text boxesBe modified in any way, so that you can also use color as an organization tool. Text boxesBe modified in any way, so that you can also use color as an organization tool.
